

Job Description

Pharmatelligence Ltd (trading as Human Data Sciences)

Job Title: Front-end Developer
Department: Livingstone
Reports to: Development Lead

About Human Data Sciences (HDS)

HDS is a healthcare data consultancy which specialises in the analysis of independent real-world evidence for healthcare services and the pharmaceutical industry. We have over 20 years of specialist knowledge and operational experience enabling us to deliver real-world evidence to improve understanding of treatment effectiveness and safety and guide better decision-making in healthcare. We have published more than 200 papers and abstracts in peer-reviewed journals and have supported numerous applications to reimbursement authorities including the National Institute for Health and Care Excellence. We are an expert supplier of research services using the Clinical Practice Research Datalink, the UK's leading healthcare data source. We are at an incredibly exciting stage of our journey. We have recently launched Livingstone®, our proprietary solution that analyses electronic medical record data, producing real-world evidence and scientific reports in minutes. Driving a new era in global health analysis, Livingstone®, is providing ground-breaking insights that will empower medical professionals, researchers and the public. Livingstone® presents an exciting opportunity for our company and for the research industry.

Overview of role:

As a Frontend Developer, you will be a key contributor to the development and enhancement of user interfaces for our applications. Working closely with designers, backend developers, and other stakeholders, you will translate design concepts into seamless and responsive web interfaces. This role offers the chance to be at the forefront of creating engaging user experiences within an Agile development environment.

Main job responsibilities:

- Implement responsive UIs from design specs, collaborating closely with designers.
- Use HTML, CSS, JS, and frameworks (e.g., React) for dynamic web apps.
- Integrate frontend with backend logic, ensuring consistency with UX/UI designers.
- Actively participate in Agile ceremonies, contributing to process improvement.
- Write unit tests for reliability and optimize code for speed/scalability.
- Participate in reviews for quality assurance and sharing best practices.

Essential Criteria:

- Bachelor's degree in: Computer Science, Software Engineering or a related field.
- 2+ years of professional experience as a Frontend Developer.
- Proficiency in HTML, CSS, Git and JavaScript.
- Experience with modern frontend frameworks/libraries (e.g., React).
- Familiarity with RESTful API integration and asynchronous programming.
- Experience with testing and debugging, including cross-browser compatibility testing
- Experience with performance monitoring, diagnosing, and optimising front-end code
- In-depth understanding of the entire web development process (design, development and deployment)
- Ability to work independently and collaboratively in a fast-paced environment.
- Ability to work with cross-functional teams to deliver on a common goal
- Team spirit and excellent communication

- Attention to detail and commitment to writing clean and maintainable code.

Desirable Criteria:

- >2 years of professional experience as a Frontend Developer
- In depth knowledge of React would be greatly advantageous
- Skills and experience in UX design would be advantageous
- Knowledge of modern web development tools and build processes (Webpack, Babel, npm, etc.)
- Experience with state management libraries such as Redux
- Working knowledge of SEO principles

What We Offer:

Competitive salaries, company pension and flexible working
A supportive culture with comprehensive onboarding
Collaboration with skilled and innovative teams
Commitment to ongoing personal and professional development

Job Type: Full-time
Location: Office based
Salary: £36,000-£48,000 depending on experience
